

Aeration Blowers and Compressors

OIL FREE, COMPACT, QUIET

Pressures up to 25 psig

Horsepower from 0.5 to 50

Rotary Vane and Regenerative Technology

New!

Submersible Aeration Blower Technology

Available in 2 Models

Pump units are designed to:

- Work underwater
- Extend vane life
- Maintain water temperature
- Noise is reduced or eliminated
- No enclosures required
- 1 phase, compact, portable

Energy Savings On
Overall Efficiency

R.E.Morrison Equipment has a full line of direct drive oil-free rotary vane compressors and high efficiency regenerative blowers that provide quiet, compact and dependable solutions for pond and tank aeration.

1750 and 3600 rpm units provide quiet, low pulse air for coarse and fine bubble aeration.

All models are available with variable frequency drives in order to match air flow with required dissolved oxygen levels or liquid aeration.

R.E.Morrison Equipment has 25 years experience in low pressure air technologies. The Becker blower and compressor originates in Germany with complete packages manufactured in Mississauga, ON.
